3. Reporting Within Your Application. Like any other functionality within your application, a report needs to be based on requirements. Project stakeholders should be working with application programmers and Agile DBAs to develop reports; the project stakeholders provide the requirements and feedback on the work of the developers.

Every day, out in the various discussion boards devoted to Microsoft SQL Server, the same types of questions come up again and again: Why is this query running slow? Is my index getting used? Why isn't my index getting used? Why does this query run faster than this query?. The correct response is probably different in each case, but in order to arrive at the answer you have to ask the same ...
