Big data refers to data sets that are too large or complex for traditional data-processing application software to adequately deal with. Data with many cases (rows) offer greater statistical power, while data with higher complexity (more attributes or columns) may lead to a higher false discovery rate. Big data challenges include capturing data, data storage, data analysis, search, sharing ...

## **Big data - Wikipedia**

Apache Hadoop is an Open Source framework build for distributed Big Data storage and processing data across computer clusters. The project is based on the following components: Hadoop Common “ it contains the Java libraries and utilities needed by other Hadoop modules.; HDFS “ Hadoop Distributed File System “ A Java based scalable file system distributed across multiple nodes.
