The human heart is situated in the middle mediastinum, at the level of thoracic vertebrae T5-T8. A double-membraned sac called the pericardium surrounds the heart and attaches to the mediastinum. The back surface of the heart lies near the vertebral column, and the front surface sits behind the sternum and rib cartilages. The upper part of the heart is the attachment point for several large ...

It sometimes seems to me that there is a gap between the ideas that laws have enshrined about things.. and the messiness of dealing with the same things in the real world. Species is one of the ideas that seemed most difficult for me, as my experience as a population geneticist was that different disciplines who study different taxa often had their own ways of thinking about them.

An artificial heart is a device that replaces the heart. Artificial hearts are typically used to bridge the time to heart transplantation, or to permanently replace the heart in case heart transplantation is impossible. Although other similar inventions preceded it from the late 1940s, the first artificial heart to be successfully implanted in a human was the Jarvik-7 in 1982, designed by a team ...
