JavaFX is a software platform for creating and delivering desktop applications, as well as rich Internet applications (RIAs) that can run across a wide variety of devices. JavaFX is intended to replace Swing as the standard GUI library for Java SE, but both will be included for the foreseeable future. JavaFX has support for desktop computers and web browsers on Microsoft Windows, Linux, and macOS.

### JavaFX - Wikipedia

Compared to the fragmented world of HTML5, where trending libraries change faster than Lady Gaga's costumes, it is very mature and easy to use.. It comes with an extensive standard library that provides all the tools you need for day-to-day development.

At the end of this article, I outline two comprehensive study guides to help you learn Meteor properly. The study guides are for both beginners and seasoned developers. The first study guide, which uses a book, a paid screencast, and some free online resources, teaches you how to build a sophisticated, modern

social-media web application with Meteor.
