between Internet gaming addiction and depression possibly mediated by sleep problems. A systematic review was conducted to gather epidemiological evidence to support or refute the link between addictive Internet gaming, problematic Internet use, and sleep problems including insomnia and poor sleep quality.

### **Internet Gaming Addiction, Problematic Use of the Internet**

Problematic internet use is a common phenomenon. The Problematic Internet Use Questionnaire (PIUQ) was first published in 2006 and its psychometric properties were checked in a study by Kelly & Gruber (2010). The latter study generally confirmed the three-factor structure.

### **Problematic Internet Use Questionnaire (PIUQ)**

Problematic internet use has been associated with increases in impulsivity and increases in social comfort while online (Davis, 2002). Problematic internet use can cause internet addiction. Young (1996) characterized internet addiction as staying online for pleasure averaging 38 hours or more per week, largely in chat rooms, and concluded that ...
