

Idn muscle Idn muscle pdf

Misleading information: Regarding the text: "Although prospective, controlled clinical trials on LDN in the treatment of cancer are yet to be accomplished as of March 2004 ... We are not aware of any clinical trial using low dose Naltrexone for any Cancer as of 2008!. Conspiracy of silence? It would be a major story if 60% of patients who did not respond to chemo really benefited from LDN ...

Low Dose Naltrexone and Autoimmune Diseases

Myostatin (also known as growth differentiation factor 8, abbreviated GDF-8) is a myokine, a protein produced and released by myocytes that acts on muscle cells' autocrine function to inhibit myogenesis: muscle cell growth and differentiation. In humans it is encoded by the MSTN gene. Myostatin is a secreted growth differentiation factor that is a member of the TGF beta protein family.
