Tom.Mitchell@cmu.edu. 1 Learning Classifiers based on Bayes Rule Here we consider the relationship between supervised learning, or function approximation problems, and Bayesian reasoning. We begin by considering how to design learning algorithms based on Bayes rule. Consider a supervised learning problem in which we wish to approximate an

machine learning. Certainly, many techniques in machine learning derive from the efforts of psychologists to make more precise their theories of animal and human learning through computational models. It seems likely also that the concepts and techniques being explored by researchers in machine learning may

10-601 Machine Learning, Midterm Exam

Introducing Machine Learning. Machine learning teaches computers to do what comes naturally to humans and animals: learn from experience. Machine learning algorithms use computational methods to "learn" information directly from data without relying on a predetermined equation as a model. The algorithms
