Research Activities: I am interested in algorithms and interfaces for improved information retrieval, as well as general issues in human-computer interaction.

Susan Dumais Homepage

Geologic modelling, geological modelling or geomodelling is the applied science of creating computerized representations of portions of the Earth's crust based on geophysical and geological observations made on and below the Earth surface. A geomodel is the numerical equivalent of a three-dimensional geological map complemented by a description of physical quantities in the domain of interest.

NEXTOR II : Introduction: The FAA Consortium in Aviation Operations Research (NEXTOR II) is a consortium of 8 universities contracted by the Federal Aviation Administration to provide research support for a wide variety of aviation issues.

NEXTOR II

A metamodel or surrogate model is a model of a model, and metamodeling is the process of generating such metamodels. Thus metamodeling or meta-modeling is the analysis, construction and development of the frames, rules, constraints, models and theories applicable and useful for modeling a predefined class of problems. As its name implies, this concept applies the notions of meta-and modeling ...

Building Information Modeling (BIM) and Safety: Automatic

Research: My research interests are in computer graphics, computer vision, parallel computing and human computer interaction. I have conducted a wide range of research on shape modeling/editing, texture mapping/synthesis, real-time rendering, GPU parallel computing, real-time face tracking, and 3D printing.

Kun Zhou

Datasets and evaluations. I believe that computer vision is advanced by careful evaluation and comparison. Consequently I have been involved in building several public datasets and evaluation websites.
