### **Road to Recovery from Parkinsons Disease – Natural**

Parkinson's disease (PD) is a long-term degenerative disorder of the central nervous system that mainly affects the motor system. Non-motor symptoms, however, become increasingly common as the disease worsens. The symptoms generally come on slowly over time. Early in the disease, the most obvious are shaking, rigidity, slowness of movement, and difficulty with walking.

### **Parkinson's disease - Wikipedia**

Parkinson's disease (PD) is a type of movement disorder. It happens when nerve cells in the brain don't produce enough of a brain chemical called dopamine. Sometimes it is genetic, but most cases do not seem to run in families.

The four most common symptoms of Parkinson's disease are tremor, rigidity, postural instability, and bradykinesia.

### **What Are Common Symptoms of Parkinson's**

Parkinson's disease (PD) is challenging to live with, as it causes progressive changes to motor function as well as many other non-motor symptoms, including depression, sleep problems, pain, and cognitive dysfunction. The disease greatly impacts the quality of life of both the person with PD, and the caregiver or care partner. Although there is much about PD that is uncontrollable, taking an ...
