Don't be frustrated if you write some JavaScript that a computer doesn't understand. Remember that computers are easily confused, and all the JavaScript instructions have to be exactly right. Computers are very picky! Little mistakes or problems in the JavaScript are called bugs. Even the best programmers make many, many bugs.

Programming Basics: Getting Started

CONSTRUCTIVE MATHEMATICS AND COMPUTER PROGRAMMING PER MARTIN-Lt)F University of Stockholm, Stockholm, Sweden ... whereby a program is supplied with its input data, which need not necessarily be in evaluated form. An expression of canonical form has itself as value.

Constructive Mathematics and Computer Programming

Computer programming is the process of designing and building an executable computer program for accomplishing a specific computing task. Programming involves tasks such as analysis, generating algorithms, profiling algorithms' accuracy and resource consumption, and the implementation of algorithms in a chosen programming language (commonly referred to as coding).

Computer programming - Wikipedia

C Programming 8. You have seen the basic structure of a C program, so it will be easy to understand other basic building blocks of the C programming language. Tokens in C. A C program consists of various tokens and a token is either a keyword, an identifier, a constant, a string literal, or a symbol.
