In cryptography, a certificate authority or certification authority (CA) is an entity that issues digital certificates. A digital certificate certifies the ownership of a public key by the named subject of the certificate. This allows others (relying parties) to rely upon signatures or on assertions made about the private key that corresponds to the certified public key.

At the beginning of the year it seemed that Crossrail was experiencing something of an information blackout. At a TfL board meeting in late January, the Mayor, its chairman, moved all further discussion about the project into "part 2" (public excluded) at the earliest opportunity. The sound of silence At the more recent Programme and Investment Committee meeting in February the Crossrail ...
